DOCUMENT RESUME

ED 256 817 TM 850 315

TITLE	District and School Profiles, 1983-84.
INSTITUTION	Dade County Public Schools, Miami, FL. Office of Educational Accountability.
PUB DATE	Jan 84
NOTE	281p.; This paper received the 1985 American Educational Research Association Division H Award for Best School or School District Statistical Profile. For the accompanying Statistical Abstract, see TM 850 316. For a previous edition, see ED 251 472. Small print throughout.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC12 Plus Postage.
DESCRIPTORS	Academic Achievement; Achievement Tests; Attendance Patterns; Class Size; County School Districts; Elementary Secondary Education; Expenditure per Student; High School Graduates; *Institutional Characteristics; Limited English Speaking; Microcomputers; Profiles; School Demography; School Personnel; *School Statistics; State Programs; *Student Characteristics; *Teacher Characteristics; Testing Programs; *Test Results
IDENTIFIERS	*Dade County Public Schools FL; Florida State Student Assessment Test; Stanford Achievement Tests

ABSTRACT

This annual report is a collection of statistical information describing some of the more important characteristics of individual schools in the Dade County Public School system. A profile sheet for each individual school provides statistics on school staff, and student characteristics, as well as a summary of student achievement information. General information about each school including location, grade organization, administrative area, and the United States Congressional District in which the school is located is provided. The profile also includes faculty experience, education, and salaries, number of instructional microcomputers, average class size, attendance rate, number of students with limited English proficiency, full time equivalent students (FTE) and average cost per FTE student. A summary of student achievement as measured by the Stanford Achievement Tests and the Statewide Student Assessment Test is also included. (DWH)

INTRODUCTION

This annual document is a collection of statistical information describing some of the more important characteristics of individual schools in the Dade County Public School system. It is intended to provide detailed information of interest, not only to the professional staff, but to the general public as well.

The profile sheet, presented for each individual school, provides statistics on school, staff, and student characteristics and a summary of student achievement as measured by the Stanford Achievement Test and the Statewide Student Assessment Test. A school is a complex organization, and efforts to characterize schools by the use of quantitative data are never complete. The factors selected for inclusion in the District and School Profiles are among those considered to be most indicative of the total school environment and of greatest concern to the educational community. Some factors, such as total Full Time Equivalent (FTE) and cost per FTE, are for the entire fiscal year 1982-83 (these are so indicated in the individual profile sheets). All the other variables, such as student and staff characteristics, describe the schools at a point in time (generally the fall of 1983-84 school year). The data for 1983-84 reflect the status as of October 1983. Variances, if any, between the data as shown in this document and the schools' records may be due to (1) changes that have occurred since October 1983 and/or (2) individual records being in a transitional stage at the time the computerized files were accessed.[1]

The document, District and School Profiles, has been published since 1979-80. In the first two years, it was published in loose-leaf format with individual schools receiving only those data sheets pertaining to their schools. Since 1982-83 the document has been published in a single bound volume and distributed countywide.

DATA DEFINITIONS

Listed below are definitions for each of the data elements in the profile sheets. The definitions are organized in the same sequence as that appearing in the individual profile sheets.

Area - the school district is divided into four geographical areas, each with an area superintendent and administrative staff. (Data Source: Annual Records, Attendance Service.)

Grade Organization - the official grade organization of a school denoting the grades at which pupils are served. (Data Source: Annual Records, Attendance Services.)

Congressional District - the territorial division from which a member of the U.S. House of Representatives is elected (in which the school is located). (Data Source: Elections Department, Metropolitan Dade County.)

---

[1] Most such transitional examples involve personnel actions. For example, a school's Black assistant principal may be retiring and an Hispanic is being hired at essentially the same time. The ethnic membership for the school's assistant principal shown in the profile will depend on the status of the two actions at the point in time at which the personnel file is accessed.

School Characteristics, 1983-84

Exceptional Student Center - a school housing in excess of nine exceptional student classes. The center schools offer the related service programs of Speech/Language Therapy, Occupational and Physical Therapy as well as educational programming based on each student's Individualized Educational Plan (IEP). (Data Source: Annual Records, Division of Student Services.)

Community School - a school providing the community with educational, cultural, and recreational services beyond those offered through the regular elementary and secondary school program. This process provides a means by which resources of the school system and the community are mobilized to provide a total learning climate. Activities provided range from children's afternoon enrichment programs to classes offered for adults and senior citizens. Community schools are distinguished from adult schools in that: (1) community schools offer programs mainly of a cultural and recreational nature, with no high school credit awarded. Adult schools offer high school credit courses and vocational/job preparatory subjects, and (2) community schools are funded primarily by tuitions, grants, and donations. Adult centers are responsible for services funded through the Florida Educational Finance Program (FEFP). (Data Source: Annual Records, Office of Vocational, Adult, and Community Education.)

Date School Established - date school center was originally established. (Data source: Historical Records, Office of Facilities Management.)

Number of Acres - acreage of the school. (Data Source: Profiles, November 1983, Office of School Operations.)

Library Media Items Per Pupil - library media items include hardback and paperback books, periodicals, newspapers, audiovisual materials and equipment. Data are for school year 1982-83. (Data Source: Annual Media Center Statistics and Inventory Report, June 1983, Division of Educational Media Programs.)

Adult School - a school serving the adult population through a variety of programs organized to give adults the opportunities for personal improvement and enrichment to enable them to participate more effectively in a changing society. Programs offered at Adult Education Centers include: elementary classes for adults, high school courses for adults, occupational preparation courses, and various vocational programs. See also the discussion under Community Schools above. (Data Source: Annual Records, Office of Vocational, Adult, and Community Education.)

Comprehensive High School - a comprehensive high school is one that offers five or more trade and industrial programs in addition to a regular academic curriculum. (Data Source: Annual Records, Office of Vocational, Adult, and Community Education.)

Percent of Utilization of Permanent Facility - this is a measure of the usage of the permanent facility in relation to its assigned capacity. Utilization is computed by dividing assigned program capacity by total student membership. Preliminary student membership (not the official count as of October 1, 1983) was used for the purpose of this computation. (Data Source: Profiles, November 1983, Office of School Operations.)

Assigned Program Capacity - represents the ideal number of pupils that can be physically accommodated in a school of a given educational program configuration. It is computed by using the Room Utilization Chart and adjusting it by program, excluding portables and relocatables. (Data Source: Profiles, November 1983, Office of School Operations.)

Books Circulated Per Pupil - the number of books checked out of school library per pupil. Data was for the 1982-83 school year. (Data Source: Annual Media Center Statistics and Inventory Report, June 1983, Division of Educational Media Programs.)

Traditional Basic Skills - a school which has been designated as such. These schools offer students a more structured learning environment and emphasis on basic skills. (Data Source: Annual Records, Department of Basic Skills.)

Chapter I - a school which has been designated as a Chapter I school. Chapter I is a Federal program that provides funds to target schools for the implementation of supplementary instructional programs in the basic skills for low achieving students. Target schools are identified on the basis of concentration of low income families residing within the attendance zone served by the school. Pupils are placed in the Chapter I program in these schools because of low basic skills achievement. (Data Source: Annual Records, Bureau of Governmental Relations.)

After School Care - a program offered by many elementary schools to meet the community's need for safe and supervised care for its elementary school children after regular school hours. The program is intended to provide this care on a cost basis. (Data Source: Annual Records, Office of Administrative Operations.)

School/Park Site - this designation applies to schools in which the playground is also a municipal/county recreational park. (Data Source: Profiles, November 1983, Office of School Operations.)

Number of Students Transported - indicates number of students transported by the district bus service to and from school. (Data Source: Profiles, November 1983, Office of School Operations.)

Number of Instructional Microcomputers - the number of microcomputers in the school as of October 1983 that are used in the instructional program. Many schools, particularly Chapter I schools, received additional microcomputers after October 1983. These are not shown in this document. (Data Source: School Summary Survey, October 1983, Office of Educational Accountability.)

Staff Characteristics, 1983-84

The top section lists the different job groups at the school and provides statistics on all the full-time and part-time staff categories by ethnic composition and sex. The numbers represent actual staff on board as of October 31, 1983, excluding open positions as of that date.[2] (Data Source: EEO-C Report, November 1983, Office of Educational Accountability.)

Number of Beginning Teachers - the number of first-year teachers. (Data Source: School Summary Survey, October 1983, Office of Educational Accountability.)

Regular Program Pupil/Teacher Ratio - ratio has been computed by dividing total students in regular programs by total classroom teachers (including special allocations to art, music, and physical education). This ratio does not represent class size. (Data Source: computation by OEA.)

Exceptional Student Pupil/Teacher Ratio - An accurate ratio cannot presently be determined because itinerant teachers, located on the file at one school (for payroll purposes), serve several schools.

Average Years Teaching in Florida - represents the average teacher's experience in Florida schools. (Data Source: Personnel File, October 1983, Management Information Systems.)

Percentage of Instructional Staff with Masters Degree - indicates percentage of instructional staff with masters degree only (those who also have specialists or doctors degrees are not included). Instructional staff includes all teachers, counselors, librarians, school psychologists and visiting teachers. (Data Source: Personnel File, October 1983, Management Information Systems.)

Percentage of Instructional Staff with Specialists Degree - indicates percent of teacher with specialists' degree (those who also have doctors degree are not included). Instructional staff includes all teachers, counselors, librarians, school psychologists, and visiting teachers. (Data Source: Personnel File, October 1983, Management Information Systems.)

Percentage of Instructional Staff with Doctors Degree - indicates percent of teachers with doctors' degree. Instructional staff includes all teachers, counselors, librarians, school psychologists, and visiting teachers. (Data Source: Personnel File, October 1983, Management Information Systems.)

Average Salary for Instructional Staff - the average salary of all teachers, counselors, librarians, school psychologists, and visiting teachers. Salaries do not include increases effective January 1, 1984. (Data Source: Personnel File, October 1983, Management Information Systems.)

---

[2] In instances where +0 percent is indicated, there is at least one person counted in this category, but the number is less than .5 percent of the total.

Teacher Salary Range - the number of teachers that fall in each salary range, not including summer school. (Data Source: Personnel File, October 1983, Management Information Systems.)

Student Characteristics, 1983-84

Student Membership - the official membership of the school as of October 1, 1983 by grade and ethnicity. The sum of the membership in individual schools does not agree with the official membership figure for the school district (223,854), since this document does not include 34 kindergarten students in Dorsey and South Dade Skill Centers and 803 students enrolled in off-campus programs for alternative and exceptional education. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Percent Not Promoted - percent of students not promoted to the next grade during the 1982-83 school year. If a student who is not promoted transferred to another school, the receiving school's records would reflect this statistic. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Dropout Rate (High Schools) - percentage of those students over the age of 16 who have been identified by school personnel as having dropped out of school. The definition of a dropout, according to Florida State Board of Education Administrative Rule 6A-S, is as follows:

> "A dropout is an individual not subject to the compulsory attendance law who leaves school either prior to high school graduation, or before completing a program of study without transferring to a private or public school or education institution, and whose records have not been requested by another educational institution within sixty (60) days during the required school year."

Data are for school year 1982-83. (Data Source: Annual Report, Office of Student Support Programs.)

Average Class Size (Elementary Schools) - computed by dividing membership by the number of full-time-equivalent teachers. (Data Source: Course Code Survey, October 1983, Office of Educational Accountability.)

Average Class Size (Secondary Schools) - average class size for each subject area is computed by dividing total number of assigned seats by the number of classes. A class is one period per day. (Data Source: Master Seat Inventory, October 1983, Department of Management Information Systems.)

Number of Pupils in A.P. Courses - number of students in Advanced Placement courses in which students can obtain college credit, depending on their A.P. test scores. (Data Source: Seat Assignment Count from ISIS Course File, October 1983, Attendance Services.)

Number of Pupils in Advanced Courses - advanced courses are higher level courses, also classified as honors courses in senior high school. (Data Source: Seat Assignment Count from ISIS Course File, October 1983, Attendance Services.)

Total Full-Time Equivalent Students - the number of FTE generated in the July, October, and February counts at that location by program. The data are for fiscal year 1982-83. (Data Source: FTE Reports for July and October 1982 and February 1983, Attendance Services.)

Average Cost Per FTE - total cost in general and special revenue funds divided by total FTE generated in each location by program, including summer school. In some instances, the cost per FTE in Exceptional Student programs may be inflated in cases where a teacher or staff member is charged to one location, even though this person may service several locations. The data are for fiscal year 1982-83. (Data Source: Cost computed by the Office of Educational Accountability from data provided by Attendance Services and the Department of Finance.)

Percent of Students with Limited English Proficiency - percentage of students whose primary or home language is other than English and who are not judged to be independent in English. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Number of Graduates (High Schools) - number of students graduating from high school and the type of diploma awarded. The data are for school year 1982-83. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Percent Free/Reduced Lunch - percentage of students receiving free or reduced price lunch. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Percent of Attendance - computed by dividing the aggregate number of days that the students are in attendance during the year into total number of student days in membership. Example: Bay Harbor Elementary - aggregate number of days in attendance (6,146, which represents a total of daily attendance figures); number of student days in membership (6,747, arrived at by totaling aggregate number of days in attendance and the aggregate days of absence); percent of attendance 91.1%, computed by dividing 6,146 by 6,747. Data are for school year 1982-83. (Data Source: Annual Report, Attendance Services.)

Number of Students with Out-of-School Suspensions - the data are for the school year 1982-83. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Number of Students Referred to Alternative Education - educational alternative programs are programs designed to meet the needs of students who are disruptive, disinterested, or unsuccessful in a normal school environment. The data are for the school year 1982-83. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Number of Students Receiving Corporal Punishment - The data are for the school year 1982-83. (Data Source: 1983-84 Fall Student Survey, October 1983, Office of Educational Accountability.)

Student Achievement

The section provides a summary of student test scores on the Stanford Achievement Test, 7th Edition and the Statewide Student Assessment Tests.

Stanford Achievement Test - 7th Edition - Dade County Public School students in grades K-11 are tested with the Stanford in late April or early May each year. (Data Source: Test File, April 1983, Office of Educational Accountability.)

> Number Tested - excepting certain exceptional and limited-English proficiency students, this includes all pupils tested in the 1982-83 school year.
>
> Median Percentile - this is the percentile score point which separates the distribution of scores into a top and a bottom half. The school median percentile may be compared to the national norm (or average) of the 50th percentile for all grades and all subtests.

Statewide Student Assessment - Each year, Florida students in grades 3, 5, 8, and 10 are assessed in the basic skill areas of reading, writing, and mathematics.

At the senior high level, the test is divided into two parts. Part I tests the basic skills, focusing on reading, writing, and mathematics. Part II deals with the application of basic skills. For example, the student may be asked to compute the cost, including Florida sales tax, of specific items listed in a newspaper ad. If a student fails to master the basic skills standards of the test, the school may use local procedures to remediate and then certify mastery at a later date. Mastery of Part II standards can be demonstrated only by taking and passing the State Assessment Part II test. (Data Source: Listings of Achievement, October 1983, Florida Department of Education.)

> Average Percent Mastery - This is the average of the percentage mastery of the assessed standards in each skill area.
>
> For the Part II test, the time of testing and percent of grade 10 students passing each section of the test is indicated.
